Orlando, FL

Biography

Michael Fasolo has vast experience in the fire service, construction, and claims adjusting industries. Michael started his career at the City of Utica Fire Department, where he had a successful 20+ year career, rising to Captain/House Commander's rank. During his tenure at the fire department, Michael never lost his passion for construction that started when he worked as a laborer at the age of 13. While working for the Fire Service, he founded a high-end construction company that he transitioned into full time after retirement from the Fire Service in 2005. To round out his skill set, Michael became a licensed insurance adjuster, where he has been writing estimates and adjusting claims since 2007. Michael's knowledge in the fire service, construction, and claims adjusting perspective, gives him a unique and progressive vision in the scoping, reporting, estimating, and investigating property damage losses for YOUNG & Associates valued clients.
